

Why studying at GUASNR?

Specialized University

GUASNR is the 1st higher education institute in Iran, specialized in Agricultural Sciences and Natural Resources and currently rank 1 university in this field nationally. The university is focused on technical-scientific fields of study, research and training students in the mentioned fields.

Towards Innovative Research

GUASNR is being considered as the heart of the entrepreneurship and innovation ecosystem of Golestan province and is interconnected with the main institutions of this ecosystem, including the Golestan Science and Technology Park. Our vision is to create a Regional Technology and Innovation Hub with a concentration on earth sciences, green value chains, and sustainable entrepreneurship.

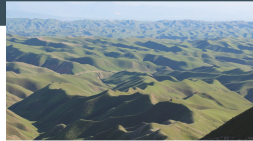

International Opportunities

GUASNR has considered the internationalization of the university activities and programs as a strategic goal. The university is providing services to academic members and students to use research and study opportunities abroad, and participating in international conferences, sabbaticals, and scholarships such as Erasmus, Mevlana etc.

Fantastic Nature

Sea, Mountains, loess hills, Hyrcanian Forest, desert landscapes, vast crop lands, climate variations etc. make the province unique and provides wonderful opportunities for education and research in the fields of agriculture and natural resources which are the core missions of university in the region. The students and researches would have the variety of ecosystems in a very short distance.

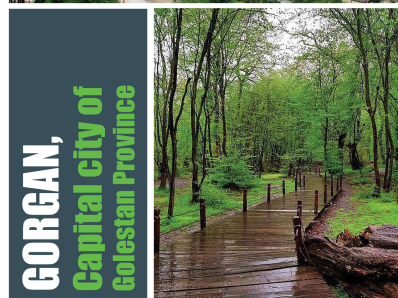

GOLESTAN» PROVINCE

Golestan Province; the magnificent hidden gem of Iran

Golestan province with the centrality of Gorgan city is of the northern provinces of Iran, which has common border with Turkmenistan. This province, with an estimate seven-thousand-year-old history is considered to be of the historically and continentally significant regions of Iran. As much as this province has climate diversity it also has many varieties in its ethnic makeup and cultural and economic structures. Defensive wall of Gorgan, Gonbad-e Qabous tower and ancient city of Jorjan are some of the historic attractions. Golestan biosphere reserve (National Park) is a well-known natural attraction worldwide.

Gorgan, capital of Golestan Province is one of the most beautiful cities in the northeastern part of Iran located on the north facing slopes of Alborz Mountain ranges. The climate is temperate, humid, and Mediterranean. Gorgan tourist attractions are numerous and exhilarating. Besides the historical attractions of this city such as the traditional bazaar and buildings and the Friday Mosque of the city, the natural ones are quite amazing as well. The intact nature and the cozy villages (Ziarat village) of this city are good opportunities to rest and relax. There are waterfalls, forests (Aland Darreh Park), deserts, shorelines of the Caspian Sea, etc. are some of the unique attractions.

Welcome To

Gorgan University of Agricultural Sciences and Natural Resources (GUASNR)

-First and rank #1 specialized University in Agricultural Sciences and Natural University nationwide
-Fantastic nature and wonderful location near the Caspian coast

Faculties and departments

The university is consisted of nine faculties and 24 departments active in offering Bachelors, Masters and PhD degrees. For the full list of the majors offered please visit the link: gau.ac.ir/en

Faculty of Agricultural Management

- agricultural economics
- agricultural extension and education

Faculty of Animal Science

- animal and poultry nutrition
- animal and poultry physiology, breeding, and genetics

Faculty of Food Science

- food Science and technology
- food process engineering and material science

Faculty of Fisheries and Environmental Sciences

- aquaculture
- production and utilization of aquatics
- seafood processing
- environmental sciences

Faculty of Forest Sciences

- silviculture
- forest ecology and forestry

Faculty of Plant Production

- agronomy
- plant breeding and biotechnology
- plant protection
- horticultural science and landscape engineering

Faculty of Rangeland and Watershed Management

- rangeland management
- watershed management
- desert management

Faculty of Wood and Paper Engineering

- paper science and engineering
- wood engineering and technology

Faculty of Water and Soil Engineering

- water engineering
- soil science
- biosystems engineering

Research at GUASNR

Besides numerous well-equipped laboratories and research opportunities in each department, there are other resources such as university central lab equipped with advanced high-tech laboratory equipment, two research farms, forest research station, the university innovation and entrepreneurship center, incubator, TTO center and Joint center with the Chinese Academy of Science in the field of water, environment and climate change as some of the many opportunities for students and researchers. GUASNR publishes three peer-reviewed international journals: International Journal of Plant Production, Poultry Science Journal, and Environmental Resources Research.

Historical Highlights

1957 GUASNR was inaugurated by Agricultural Minister as the Junior College of Forestry and Range Management

1975 School of Natural Resources

1981 Become Part of Mazandaran University

1986 Gorgan University Complex of Agricultural Sciences and Natural Resources

1992 Gorgan University of Agricultural Sciences and Natural Resources

Total number of students: 4000

Academic staff: 187

Two main campuses

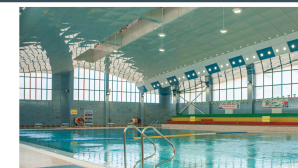

Partners:

- over 60 collaboration agreements with partners in 20 countries
- over 10 Erasmus+ and Mevlana all over EU

Admission

Applicants are recommended to visit our website <https://www.gau.ac.ir/En/> to get more information about the university, majors and programs offered for undergraduate and postgraduate studies, and admission requirements, tuition fee and scholarships. Applicants should first complete the application form available on the above page and send it to the e-mail address of the supervision of international student's office, iso@gau.ac.ir
